

IN THE ABSTRACT

The Abstract as amended below with a replacement Abstract shows added text with underlining and deleted text with ~~strikethrough~~.

Please **REPLACE** the Abstract as marked below to show changes. The replacement Abstract is submitted on a separate sheet (37 CFR 1.72).

~~--The present invention includes~~A device is provided in which a video image control
~~means for acquiring~~controller acquires information for a plurality of video images from a video
image source, a cursor position control~~means for calculating~~controller calculates cursor position
information and ~~generating~~generates cursor image information, a display image ~~generating~~
~~means for synthesizing a generator synthesizes the~~ plurality of video images and the cursor
image information and ~~displaying~~displays the same on a display device, a distance information
~~generating means for generating~~generator generates distance information based on the video
image position information and the cursor position information, and an audio output ~~control~~
~~means for deciding~~controller decides volume of audio for the plurality of video images based on
this distance information, and ~~making output to~~outputs to an audio output device.--
